Designing from self comes with a price as it’s a way of freedom, especially when you have to stay up late at work to ensure that your team is meeting the deadline for projects. It’s also necessary to ensure that the home is a reflection of the designer’s style and personality. For Jimmy Nitya, a self-taught designer who has never stopped learning, this is his family’s home in Burrabazar, which he designed with great care.

The home is a perfect example of how to blend functionality with aesthetics. The open-plan design allows for natural light to fill the space, creating a warm and inviting atmosphere. The living room features a large, comfortable sofa and a beautiful rug, which adds a touch of elegance to the room. The kitchen is modern and well-equipped, with a large island and plenty of counter space for preparing meals.

The bedrooms are spacious and comfortable, with large windows that allow for plenty of natural light. The bathrooms are also modern, with sleek designs and high-end fixtures.

Overall, the home is a perfect reflection of Jimmy’s design philosophy, which is to create spaces that are both functional and beautiful. It’s a testament to the fact that self-designed homes can be just as successful as those designed by others.
